

We need to select all on the prospects page

The heading here isn't actually true. If you close this page, you can't re-access it and then also there's a last step for done. We're encouraging the user to close the tab and yet there's a next button. Do you understand how this is, if it may be confusing? We either need to change the text below import, or make this the last step, or make it such that we can return to this view or something

No longer need this button in the overview page remove it or make it admin-only. It should say ad credits or something similar.
