

QuickStart Guide

Introduction

Welcome to REISift! We're thrilled to have you on board and are eager to support your journey. This guide outlines the initial steps to optimize your account for success. Feel free to use this as a reference or join our [REISift QuickStart: Essential Systems & Processes in 60 Minutes](#) to watch us walk through the setup process with you.

REISift Navigation

Start by exploring our dashboard. It's crucial to know your way around REISift and understand where to find help if you have any questions.

The screenshot shows the REISift Dashboard with various metrics and navigation options. Callouts highlight key features:

- Add funds for skip tracing and direct mail**: Points to the 'Buy Credits' button.
- Get Answers Fast**: Points to the 'Talk To Us' button.
- Add property records to your account**: Points to the 'Upload File' button.
- Find Solutions Easily**: Points to the 'Help Center' button.

Dashboard Overview:

- New Records Uploaded**: 0/25,000 (0% of monthly limit). Upload limit renews on Apr 1st 2024. [Upgrade Plan](#)
- Vacancy Ratio**: Vacant Records 2% (126). Legend: Total Records (light blue), Vacant Records (dark blue).
- Vacancy Status**: Newly Vacant Last 30 days: 1. -2 compared to last month.
- Total Records**: Records in Platform: 7,198 /unlimited.
- Records with numbers**: With Numbers 4% (293). Legend: Total Records (light blue), With Numbers (dark blue).
- Skip Trace Status**:
 - Total Not Skipped: 5930 - 82% of total
 - Total Skipped Without Numbers: 975 - 14% of total
- Tasks Calendar**: View All. Calendar showing dates from Mon 26 to Sun 31. Today is Fri 8.
- ASSIGNED TASKS**:
 - ☐ Pull Probate Records and Upload to REISift
 - Due on 03/08/24 11:59PM
 - @ Jessica Peters

First Steps

Now that you're familiar with navigating the dashboard and know where to seek assistance, let's dive into the initial steps to set up your account.

1. Add your team

Invite your team to your REISift account and assign user permissions that best fit their roles.

The screenshot displays the REISift Dashboard with the following components:

- Top Bar:** Includes the REISift logo, a sidebar menu (Dashboard, Records, Lists, Tags, Activity, Tasks, Sequences, Settings, Sift Dexp, Community, Rewards), and user information for "Kylie Palmer" with a balance of \$0.00 and a "Premium Support" button.
- Main Content Area:**
 - New Records Uploaded:** A progress bar showing 0/25,000 records uploaded, with a note "Updated last record on Mar 1st 2022" and an "Upgrade Plan" button.
 - Vacancy Ratio:** A donut chart showing 4% (142/35) with a legend for "Total Records" and "Vacant Records".
 - Vacancy Status:** A section titled "Newly Vacant" showing 63 records (Last 30 days) with a "+46 compared to last 30 days" indicator.
 - Total Records:** A large circular gauge showing 35,072 records in the platform, labeled "Unlimited".
 - Records with numbers:** A donut chart showing 0.1% (34) with a legend for "With Numbers" and "Without Numbers".
 - Skip Trace Status:** A horizontal bar chart showing "Total Not Skipped" at \$4,785 (10% of total) and "Total Skipped Without Numbers".
- Tasks Calendar:** A calendar view for the month of March, with a "View All" link.
- ASSIGNED TASKS:** A list of tasks including "Follow up Call/text" and "Follow up - New Lead", each with a due date and a "Series" link.
- Video Overlay:** A large play button icon in the center of the dashboard with a "6 min" duration indicator.
- Need help?:** A section at the bottom right asking "Do you have any trouble using REISift?"

A vertical blue banner on the right side of the dashboard reads "click to watch".

Learn how to add a user and understand user permissions by [clicking here](#).

2. Add Lists and Tags

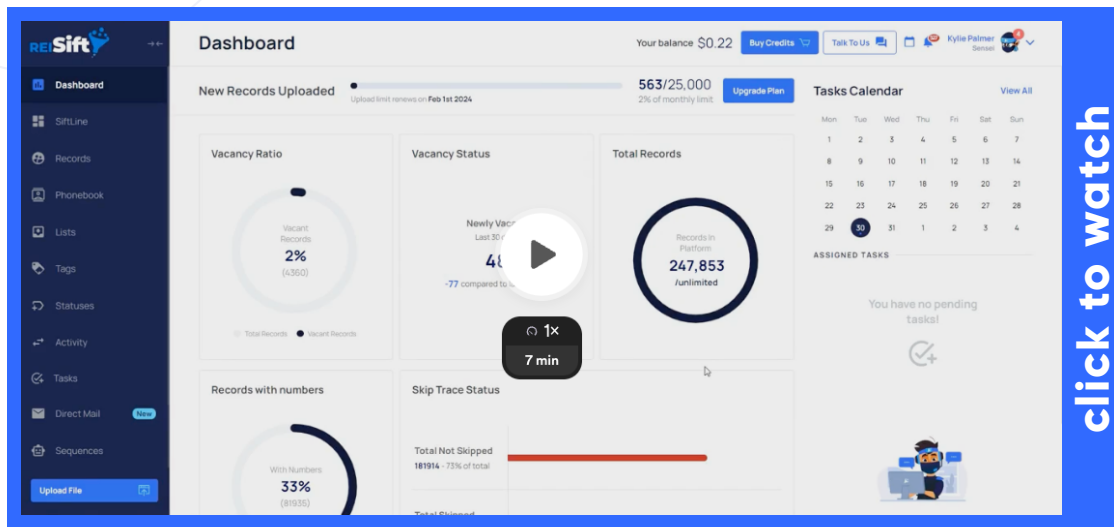

What is the difference between lists and tags?

Lists serve as designated spaces for your records. Each list type should have a single, high-level name in REISift. For example, all Probate records should be consistently uploaded to one specific Probate list.

Tags, on the other hand, are used to track the 4 Ws of data management. They provide insights into the records' history. It's essential to use tags to mark a record's journey, including its origin, present location, and significant events. Examples of tags include 'Date uploaded', 'Source' of the data, and 'Skip trace' tags.

3. Add some Data

Time to add some records to your account!

Find out more about accessing Nationwide Data with SiftMap [here](#).

Need to upload data instead? [Uploading New Records](#).

4. Set up your Integrations

Now that your data is in the system, explore integration options with our top-notch partners. Discover who they are and how to connect your account in our [Integrations Overview](#) article.

Tasks

In REISift, tasks are essential for streamlining your operations. They enable you to:

- Handle hand off between roles
- Follow Up with Leads
- Follow Up with Not Interested
- Reminders to complete daily or weekly Tasks

To optimize task management in REISift, we offer two key features: Task Presets and Recurring Tasks.

Recurring Task

A recurring task is a task that will repeat at the interval selected. You will navigate to the Tasks Page and select Create New task. One example of a recurring task would be to Check your Skip Trace Filter weekly and skip trace those records.

Find out more about recurring tasks here:

NOTES / INSTRUCTIONS

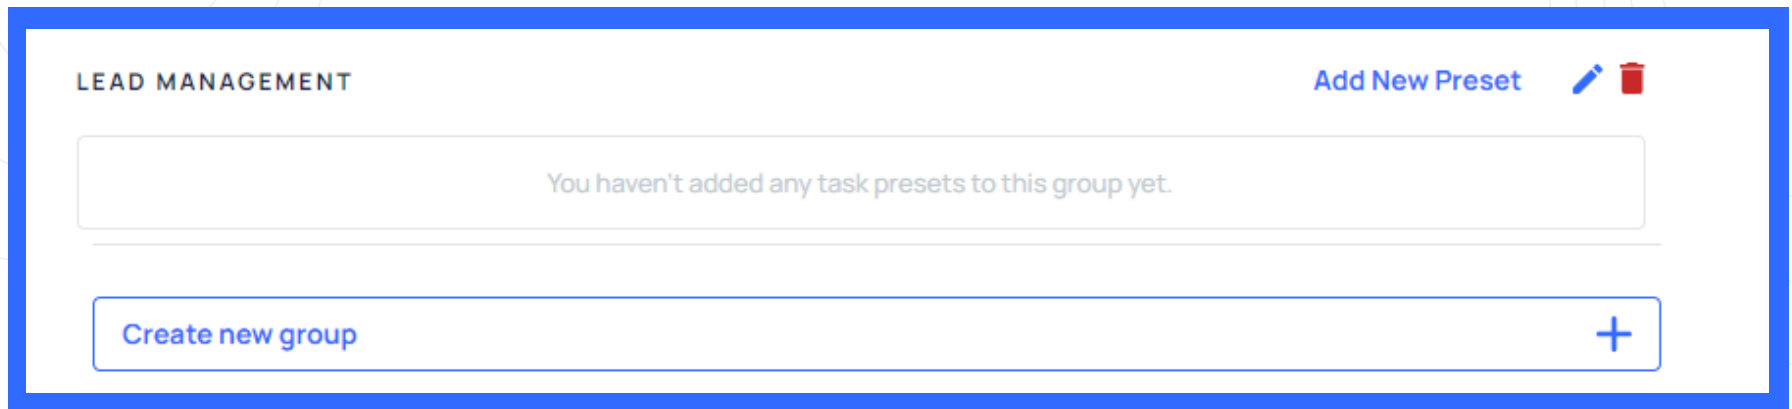

Apply Needs skipped filter and skip trace any records there

Task Presets

A task preset is a saved task that can be assigned to property records manually or through automations. This is very useful as it makes assigning tasks quicker than creating a new task each time one is needed and provides consistency so that each time a task is assigned it has the same name and settings.

A great first task preset for most users is a **Call New Lead** Task.

First Navigate to the **Tasks Page** and select **Configure Presets**. You will need to first create a task group. In this example we will create a group called **Lead Management**.

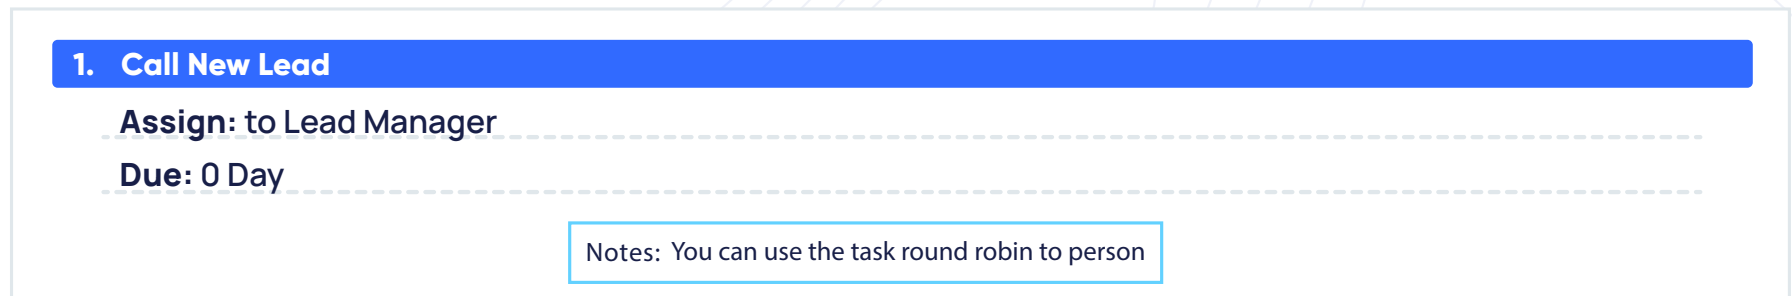

LEAD MANAGEMENT Add New Preset

You haven't added any task presets to this group yet.

Create new group +

Once you have created a Task group, click Add New Preset to create the Call New Lead task preset.

1. Call New Lead

Assign: to Lead Manager

Due: 0 Day

Notes: You can use the task round robin to person

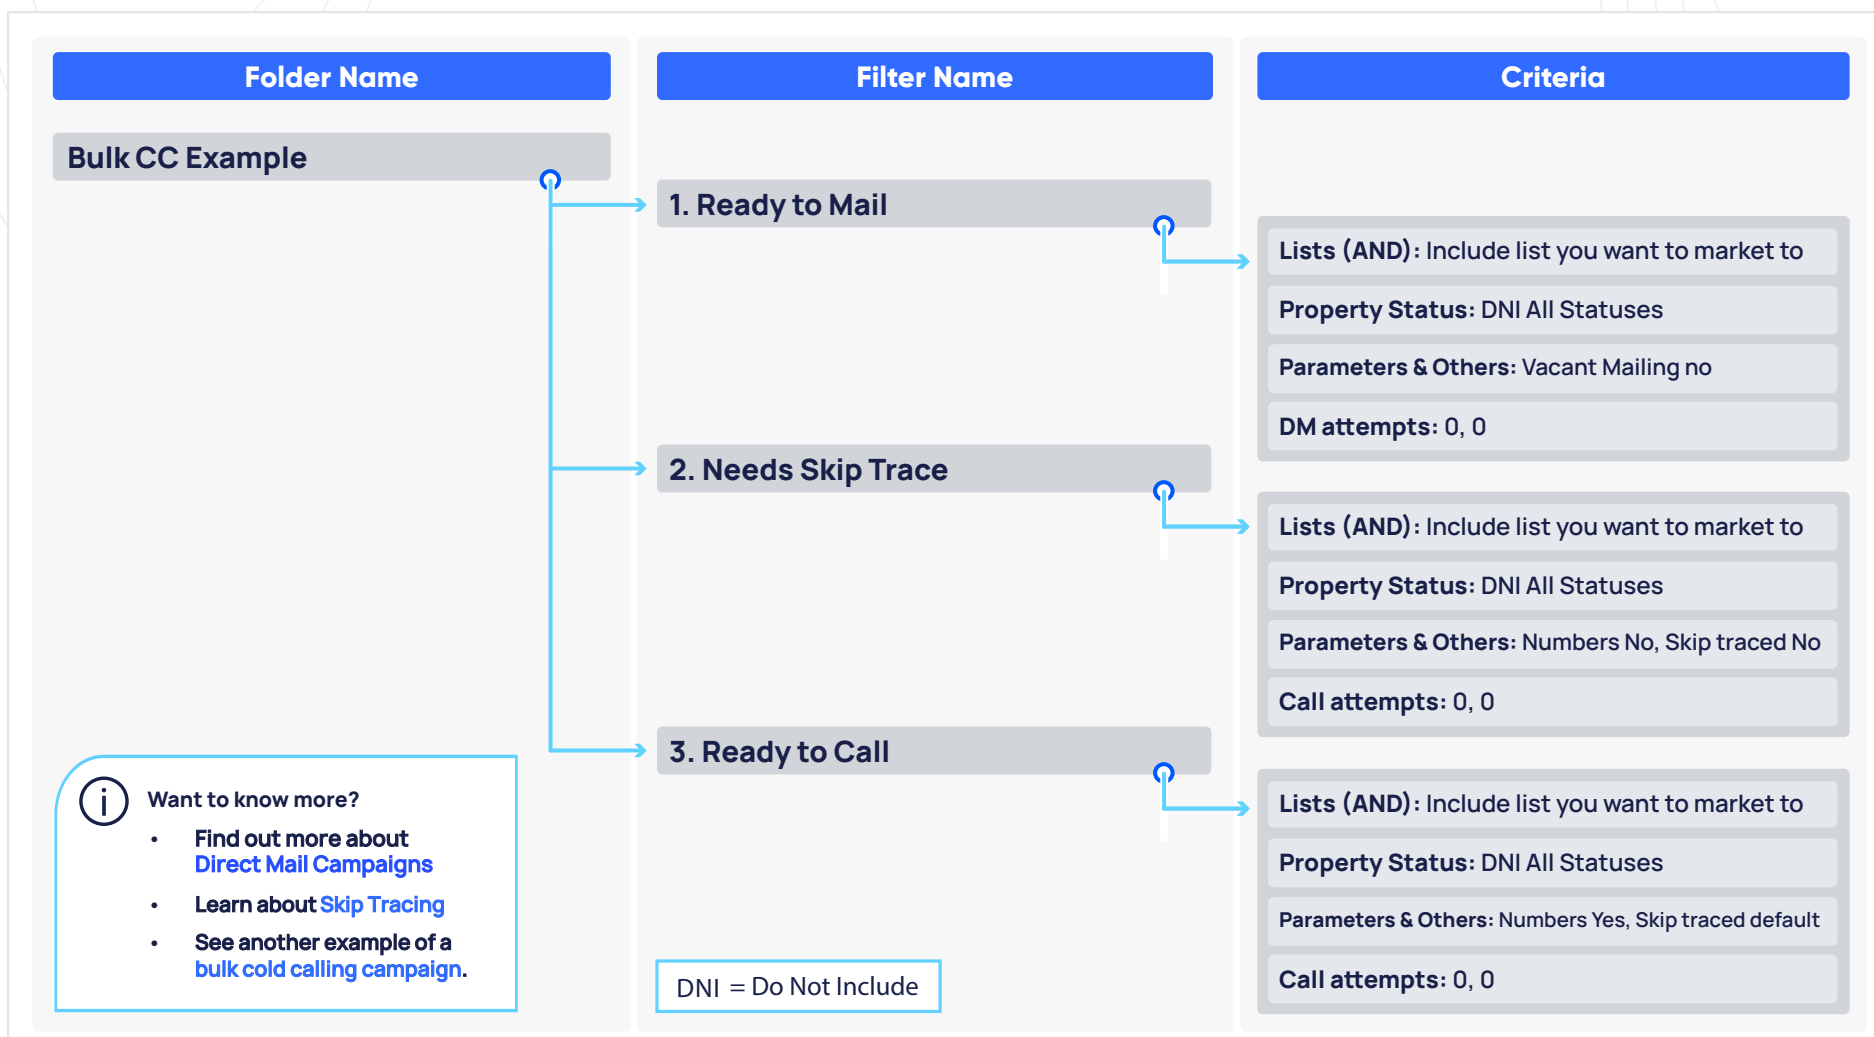

Find out more about creating tasks [here](#).

Marketing Flow

Next, it's time to set up a super simple marketing flow. To do this we will utilize filter presets. A filter preset is a saved set of filter criteria, this way you don't have to manually filter by this criteria every time. Instead you can apply the saved filter preset.

First, navigate to the Records page and then click Filter Records. Then click view presets. We will first create a folder to store the filter presets in. Click Create New Folder and name the folder "Example Marketing Flow" and choose the permissions. Remember, this is just one way to set up a marketing flow, you should adapt to your market needs.

We will create 3 filters today. Below, will be the filter criteria for these three filters. Click [here](#) to find out more about saving filter presets.

Sales and Lead Management

Now that you have a marketing flow set up, let's talk about how take care of the new leads that are generated in that marketing. First we will set up a Siftline board and then a sequence to tie it all together.

Siftline

Siftline is our Kanban board solution in REISift. This board view allows you to have a birds eye view of your processes. Siftline boards are fully customizable. Read more about them [here](#).

In this example, we will create one board to handle the lead and sale process from new lead all the way through the deal closing. However, keep in mind this is just to show you how to utilize Siftline. Many users create separate boards for phases of the sales and lead process.

Board 1 - Lead → Close

New Lead
Engage New Lead
Cold
Warm
Hot
Make Offer
Offer Follow Up
Offer Accepted
Offer Declined
Under Contract
Clear to Close
Closed \$\$\$
Deal Fell Through

Sequences

Sequences are automations in REISift. In this training we will create one sequence. The New Lead Sequence is the first sequence for many users. This sequence will be used to ensure that when a status is changed to new lead in REISift a set of actions takes place. In this case, a task will be assigned and the property will be added to the Siftline board created in the previous step.

Read all about sequences [here](#).
